# TECHNICAL INFORMATION

## EMAS validation

V & B Fliesen GmbH was the first German tile manufacturer to participate in the EMAS (Eco-Management and Audit Scheme), currently the strictest test system for environmental criteria, at Merzig, Mettlach and La Ferté-Gaucher. It calls for a continuous, performance-oriented and regularly measurable optimisation process in which employees must also be involved.

In 2013, Bureau Veritas recertified V & B Fliesen GmbH for another three years.

## Certifications

N° DE003686-1 / N° DE003773-1

### DIN EN ISO 9001

The DIN EN ISO 9001 quality management system has been documenting the ongoing optimisation of work processes throughout the company since 1995.

### DIN EN ISO 14001

Based on the plan-do-check-act cycle and ongoing improvement in environmental performance, DIN EN ISO 14001 specifies the main requirements for identification, monitoring and supervision of direct and indirect environmental aspects in the company.

### DIN EN ISO 50001

V & B Fliesen GmbH is certified in compliance with standard ISO 50001 as a company with particularly energy-efficient production.

All certifications are carried out by Bureau Veritas.

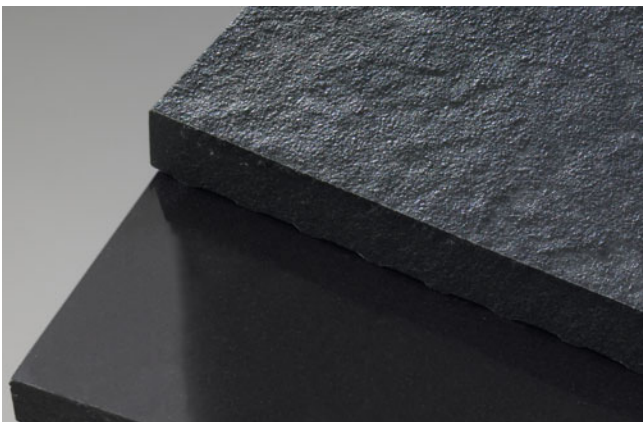

# TECHNICAL INFORMATION

## ceramicplus

Villeroy & Boch

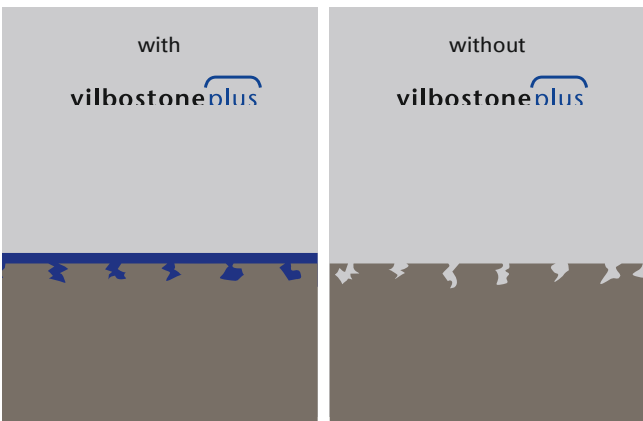

The **ceramicplus** finish is applied to our nonvitreous wall tiles at the factory. Our tiles thus require much less care. Often, the only cleaning materials that are required are water and a cloth; aggressive cleaning agents are redundant.

## vilbostone

Porcelain stoneware

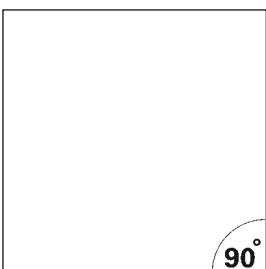

vilbostone porcelain stoneware permits a wealth of different surface designs featuring unusual colour and sheen effects. vilbostone porcelain stoneware is available both glazed and unglazed, with a matt, polished, rough-polished or relief surface finish and in various classes of slip resistance.

## vilbostoneplus

Unglazed vilbostone porcelain stoneware with a matt or rough-polished surface finish have the vilbostoneplus seal, which renders the tiles particularly resistant to dirt and stains. During the manufacturing process, the structure of the tile surface is sealed in order to further increase the tiles' resistance to staining and dirt, as a result of which subsequent treatment with impregnating agents is no longer necessary.

### Rectified Tiles

View from above

View from side

### Slip resistance

**R9:** 6° – 10°    **R10:** 10° – 19°    **R11:** 19° – 27°    **R12:** 27° – 35°    **R13:** > 35°

The slip resistance of tiles is tested on an inclined plane with a pre-determined angle of inclination and classified according to rating groups R9 to R13.

# SIGNS AND SYMBOLS

---

**2 3 4 5** Glazed vitreous floor (or wall) tile classified in the indicated wear-resistance group in acc. with DIN EN 10545-7. For heavily frequented application areas or those subjected to extreme surface wear - for example in the areas surrounding cash tills or entrance areas to passage ways - we recommend the use of unglazed porcelain stoneware, which has an unusually high degree of wear-resistance.

-  Anti-slip in workshop areas.
-  Anti-slip in barefoot areas.
-  Precious metal-plated.  
Not scratchproof. Clean with water or dish washing liquid only. Jointing with quartzpowderfree material only.
-  Glass-plated.  
Hairline cracks in the glaze may develop.
-  Handpainted.  
Hairline cracks in the glaze may develop.
-  One glazed edge.
-  One glazed long edge.
-  Two glazed edges.
-  frostproof in acc. with DIN EN 10545-12
-  Rectified
-  Sample tiles available for a charge
-  Produced to order only, not stocked as standard.  
Cancellation not possible.
